

## LITTLE LEAF LINDEN *Tilia cordata*

Zones 3 4 5 6 7 8  
and north in zone 10

Symmetrical, pyramid-shaped deciduous tree. Fast growing. Height 20' (6m) in 10-12 years, matures to 50-70' (15-21m); spreads 25-30' (7.5-9m).

Flowers in midsummer, yellow-white and very fragrant, attractive to bees. Followed by tiny inedible fruit which persist into winter.

Leaves 1½-3" (3.8-7.6cm) long, lopsided, mid-green.

Tolerates urban pollution.

Fall color of yellow with cool nights; in mild climates, leaves remain green until killed by frost.

**Soil:** deep, moist, well-drained. Deep root system.

**Light:** full sun or light shade.

**Pruning:** rarely needed. Remove suckers at ground level.

**Uses:** street tree, shade tree.
